Slee Off-Road strives to provide comprehensive installation instructions. However, in some circumstances minor inconsistencies may be encountered with instructions and or provided parts. If you encounter such an inconsistency, please notify us, as your input is important. Slee Off-Road guarantees all parts free from defects for one year from the original purchase date.

1. Get organized and verify all parts are present.

Determine Compressor orientation. ARB CKMA12 Compressor can be mounted easily with several options at the installer's preference.

ARB CKMATA12 Twin Compressor must be mounted closet to the engine as possible to allow manifold to be mounted on fender side of bracket (Step 1A). Mount compressor with ARB supplied hardware. If installing a twin compressor and manifold mount (do not tighten) as shown (Step 1B).

If Twin Compressor is installed note bolt orientation for support leg (reference Step 1C & 4B).

Hardware;

2 x M6 x 16 Flange Head Bolt *
2 x M6 Flange Nut *

Note; * Depending on your installation not all hardware may be used.

Compatibility; ARB CKMTA12 Twin Compressor (may require Manifold kit #171503) / ARB CKMA12 Compressor. Pump up kit sold separately (#171302).

If ARB CKMAT12 Compressor is installed with lockers note 2 x 90° fittings are required and are sold separately (Step 1B, item Circled). Fastenal Part# 0441414

Get organized, determine compressor mounting position. Arrows indicate twin compressor mounting location **(Step 1A)**

Mount manifold to bracket if applicable - note orientation of manifold brackets (do not tighten). ARB Locker Solenoids installed to show orientations **(Step 1B)**

Bolt orientation for Twin Compressor **(Step 1C)**
