## Slee Off-Road E-Locker Control Circuit Board (SOF1105) - Installation Instructions

Qty	Parts Included
1	E-Locker Control Circuit Board with Pigtail

Thank you for your purchase from Slee Off-Road! If you should you have any questions or concerns, please do not hesitate to contact us immediately at 1-888-4X4-SLEE or at [info@sleeoffroad.com](mailto:info@sleeoffroad.com).

Slee Off-Road strives to provide comprehensive installation instructions. However, in some circumstances minor inconsistencies may be encountered with instructions and or provided parts. If you encounter such an inconsistency, please notify us, as your input is important. Slee Off-Road guarantees all parts free from defects for one year from the original purchase date.

Code	Wire Color	Function	Hook-Up
SW1	ORANGE	SWITCH	Post on normally open switch
SW2	ORANGE	SWITCH	Post on normally open switch
M1	WHITE	MOTOR	Actuator – Dark Green (Thick Wire)
M2	BLUE	MOTOR	Actuator – Dark Green with Red Trace (Thick Wire)
L1	GREEN	LIMIT SWITCH	Actuator - Green
L2	YELLOW	LIMIT SWITCH	Actuator – Yellow
+12v	RED	+12V IGNITION SOURCE	
GND	BLACK	CHASSIS GROUND	The black wire at actuator needs to be properly grounded

**\* Note;** 9.5" Toyota Differentials (80/100 Series) requires the motor wires to be swapped.

The Slee Off-Road E-Locker control board was designed to be used with any OE Toyota Electric Locker. The above wiring diagram describes the necessary information for installation.

The actuator colors refer to the pigtail coming directly out of the Toyota actuator. These colors are consistent throughout all Toyota E-Locker actuators. Also, the black wire at the actuator needs to be grounded. We've had success grounding it directly to one of the actuator mounting bolts.
